

## A Brief Descriptive Geography of the Empire State; For the Use of Schools with 25 Outline Maps on Uniform Scale, 5 Relief Maps, and 125 Illustrations

By Charles William Bardeen

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1895 Excerpt: .Frosts begin from September 1st to October 1st, and end from April 1st to May 1st, according to the locality and year. In the Adirondack region the snow-fall is heavy, the winter long and severe. In central New York it is not uncommon for snow to accumulate to the depth of 3 or 4 feet, and yet this is not persistent. About New York city and on Long Island the snow rarely exceeds a foot in depth, sleighing is always uncertain, and sometimes the ground will be bare, for weeks together. Thus it will be seen that the climate of New York is intermediate in character between that of New England and that of the Mississippi valley States, --a little milder than the former, severer than the latter. The great lakes which border it are never frozen to their centres, and exert an equalizing influence upon...
