Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1875 edition. Excerpt: .scale-like exopodite. The black arrow is inserted into the orifice of the duct of the green gland. A three-jointed protopodite is succeeded by two long multi-articulated filaments, the exopodite and endipodite. An aperture protected by membrane in the proximal joint, and towards which the arrow points, is the auditory organ. 1 The eye-peduncles are composed of two segments, the distal one of which carries the eye itself. On the left of the specimen is a portion of the skeleton of a female, with the ventral surface turned upwards, so as to shew the openings of the oviducts on the protopodite of the third pair of ambulatory legs. The two orifices are indicated by two black arrows. The first pair of post-abdominal appendages differs from those of the male in being simple unmodified filaments. The structure of the stomach is illustrated by the two specimens marked A and B. In B the greater portion of the cephalothorax has been removed so as to expose the cavity of the thorax, with the stomach in its natural position. This viscus occupies nearly the whole of that part of the cavity which lies in front of the cephalic suture, and its membranous walls are supported and strengthened by a some IP pair. (Antennules.) what complicated arrangement of calcified bars and plates. It is divided transversely by a rather deep fissure into an anterior layer or cardiac portion, and a posterior smaller or pyloric division. The structure of the...
