It promotes adaptive planning, evolutionary development, early delivery, continuous improvement and encourages rapid and flexible response to change. [1] In the agile software development different tools are used for the management of projects. Every one use these tools according to their need and requirements. If we take a look on the past then we came to know that different companies were mainly used MS Excel, word, and PowerPoint for storing and managing requirements and product backlogs and MS PowerPoint for managing projects. The development teams, on the other hand, used simple physical tools such as paper, sticky notes, and whiteboards. But it is experienced that the simple tools were insufficient for and unsupportive in managing large numbers of requirements and projects. So we got the need of some tools...
