VISUAL PIGMENTS IN MAN (CLASSIC REPRINT) (PAPERBACK)

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Visual Pigments in Man Lecturer the University of Liverpool has in some ways broken with tradition. For they have turned from the succession of giants to a man of ordinary stature and bestowed this distinction upon one who was neither a colleague of Sherrington nor his pupil, nor is even a specialist as to brain or spinal cord. Whatever may be thought of their choice of man, however, it cannot be doubted that the organisation of the retina is a most appropriate topic with which to commemorate what Sherrington stood for in scientific thought. For, as he clearly realized, the retina is a self-contained and exquisitely organized outgrowth Of the central nervous system, and nowhere is the relation between neural interaction and sensory perception more clearly displayed. But the wider I paint the sweep of my subject, the narrower will appear the treatment I have given it. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
