

Measure of the Earth: The Enlightenment Expedition That Reshaped Our World

By Larrie D. Ferreiro

The Perseus Books Group, United States, 2013. Paperback. Book Condition: New. Reprint. 208 x 140 mm. Language: English . Brand New Book. In the 18th century, Europe's scientific community was torn between two opposing theories: Descartes' argument that the Earth was spherical, and Newton's contention that it was flattened at the poles. Recognizing that the answer was the key to securely navigating the earth's oceans, France and Spain organized a joint expedition to colonial Peru. Their goal was to measure a degree of latitude at the Equator; by comparing this measurement to one taken back in Europe, they would be able to determine the planet's shape and put an end to the debate. But what seemed a straightforward scientific exercise was almost immediately marred by a series of unforeseen catastrophes: treacherous terrain, deeply suspicious locals, and the voyagers' own hubris. A thrilling tale of adventure, political history, and scientific discovery, Larrie D. Ferreiro's *Measure of the Earth* recounts the greatest scientific expedition of the Enlightenment through the eyes of the men who completed it - pioneers who overcame tremendous adversity to traverse the towering Andes Mountains and discern the Earth's true shape.
