Interactions between CO2,  
saline water and minerals

Condition: New. Publisher/Verlag: VDM Verlag Dr. Müller | Interactions between CO2, saline water and minerals | Underground storage of CO2 in saline aquifers has been suggested as an option to reduce man-made emissions of CO2 to the atmosphere. Injected CO2 reacts with the formation water and form carbonic acid which in turn lowers the pH and leads to corrosion of formation minerals. Liberated elements reacts subsequently and form stable mineral carbonates. The doctoral thesis gives an overview of gas-water- rock...
