Association for Supervision & Curriculum Deve. Paperback. Condition: New. 139 pages. Dimensions: 9.7in. x 7.9in. x 0.4in. How do the arts stack up as a major discipline? What is their effect on the brain, learning, and human development? How might schools best implement and assess an arts program? Eric Jensen answers these questions and more in this book. To push for higher standards of learning, many policymakers are eliminating arts programs. To Jensen, that's a mistake. This book presents the definitive case, based on what we know about the brain and learning, for making arts a core part of the basic curriculum and thoughtfully integrating them into every subject. Separate chapters address musical, visual, and kinesthetic arts in ways that reveal their influence on learning. What are the effects of a fully implemented arts program? The evidence points to the following: Fewer dropouts, Higher attendance, Better team players, An increased love of learning, Greater student dignity, Enhanced creativity, A more prepared citizen for the workplace of tomorrow, Greater cultural awareness as a bonus. To Jensen, it's not a matter of choosing, say, the musical arts over the kinesthetic. Rather, ask what kind of art makes sense for what purposes. How much time per day? What kind of music? Should the arts be required? How do we assess arts programs? In answering these real-world questions, Jensen provides dozens of practical, detailed suggestions for incorporating the arts into every classroom. This item ships from multiple locations. Your book may arrive from Roseburg, OR, or La Vergne, TN. Paperback.
