

Transactions of the Canadian Society of Civil Engineers Volume 6, pt. 1

Filesize: 6.87 MB

Reviews

Definitely among the finest pdf I actually have at any time read through. It is one of the most amazing pdf i actually have study. I discovered this ebook from my i and dad recommended this pdf to find out.
(Turner Stiedemann)

TRANSACTIONS OF THE CANADIAN SOCIETY OF CIVIL ENGINEERS VOLUME 6, PT. 1

DOWNLOAD

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 42 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1892 edition. Excerpt: . . . series by transverse pieces. There are, therefore three times as many bars on the armature as there are magnetic poles. The three circuits are joined up to each other in a manner similar to the three circuits of the Thompson-Houston arc machine. The exciting circuit is coiled around a sort of castiron pulley. Two steel rings, each armed with horns forming pole-pieces, are bolted on to the pulley, one on either face. The spacing between the horns on each steel rim allows the horns of the opposite one to intersect, thus giving an alternating series of poles. This machine can work equally well as a synchronizing motor, and can be made to start without difficulty. It is claimed for this design that the total weight of copper on the field-magnet is very much less than is required for other machines of the same size. To excite the machine on open circuit only one-twentieth per cent. of the output is required. At full load, owing to the reaction of the armature, this amount is slightly increased. At full speed and with normal volts, the friction losses amount to about 1, 6 per cent. of the maximum output. The loss due to heating, (C2E), by the currents is a little less than this. When all losses are taken into account it is claimed that the machine has a commercial efficiency of 96 per cent. The dynamo used in the Lauffen-Frankport transmission, to be described further on, was...
