

Developments in Applied Spectroscopy

Filesize: 7.74 MB

Reviews

Great electronic book and useful one. It can be written in straightforward terms rather than difficult to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.
(Kian Harber)

DEVELOPMENTS IN APPLIED SPECTROSCOPY

Springer Dez 2012, 2012. Taschenbuch. Book Condition: Neu. 229x152x24 mm. This item is printed on demand - Print on Demand Neuware - Volume 9 of Developments in Applied Spectroscopy presents a collection of twenty-three selected papers presented during the 21st Mid-America Symposium on Spectroscopy, held in Chicago, June 2-5, 1970. In general, these papers are those of the symposium type and not papers pertaining to a specific research topic that one would expect to find in the journals. The 21st Mid-America Symposium was sponsored by the Chicago Section in cooperation with Cincinnati, Cleveland, Indiana, New England, New York, Niagara Frontier and Ohio Valley Sections of the Society of Applied Spectroscopy, and the Chicago Gas Chromatography Group. Although the Mid America is still occasionally thought of as a regional meeting, its attendees and authors come from all parts of the United States and Canada as well as other countries outside North America. Both theoretical and applied principles were presented in sessions on emission, molecular and atomic absorption, x-ray, mass, nuclear, electron, and nuclear magnetic and electron spin resonance spectroscopy; air and Water pollution analyses; biomedical technology; polymers and elastomeric materials; and computer applications. The chairmen of the Symposium Committees, Mr. E. Baclavski, Dr. W. K. Baer, Mr. J. E. Burroughs, Dr. C. R. Brundle, Mr. C. Hastings, Mr. J. B. Himes, Mr. R. Isaac, Dr. R. J. Jakobsen, Mr. J. Kinder, Dr. J. L. Koenig, Mr. W. A. Loseke, Dr. R. Mattoon, Miss V. McMahon, Dr. C.E. Moore, Mr. C. S. Naiman, Dr. M. J. Oestmann, Mr. C. R. 464 pp. Englisch.
