Forgotten Books, United States, 2015. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Lessons in Mechanics: A Text for or Colleges and Technical Schools This book and a companion volume entitled Lessons in Electricity and Magnetism have been arranged to meet the needs of the two-year schedule in elementary physics which has been recently adopted in some of our technical schools, and, in our opinion, most of the added emphasis which this two-year schedule involves should be directed towards the mathematical side, or, let us say, the mathematical bottom of the subject. The two-year schedule in elementary physics, beginning with the Freshman year, means that teachers of physics cannot base their work upon college courses in mathematics to the extent that might have been possible heretofore; but we believe, nevertheless, that teachers of physics can and should make use of the more powerful mathematical methods from the beginning. Accordingly we have used differential and integral calculus throughout these new texts, but without demanding the previous study of calculus by the student. The central idea underlying these new texts is that mathematical training must be accomplished by the combined efforts of teachers of mathematics and teachers of physics, and it is hoped that these texts may help to bring our physics teachers to what we believe to be their proper function in the important and difficult matter of mathematical training. If our students were to come from their mathematics teachers fully able to use their mathematics there would be nothing left for the rest of us to do! The central purpose of these new texts is to facilitate classroom work. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
