LOUISIANA CONSERVATIONIST, VOL. 3: MARCH, 1951 (CLASSIC REPRINT) (PAPERBACK)**DOWNLOAD**

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Louisiana Conservationist, Vol. 3: March, 1951 The purpose of this article is to indicate that Lampreys of the Chestnut species, the not dangerous kind, are appearing in unusual numbers at present in Louisiana waters. It is the belief of the writer that in the case of Lake Catahoula, this is due to the unusually low water conditions that occurred during the winter of 1950-51, whereby the Lampreys were concentrated together with concentrated populations of game and commercial fish. These Chestnut Lampreys have never been known to cause extreme damage anywhere, even though they do destroy some fish. Recently, a sports fisherman caught one Largemouth Black Bass (green Trout) to which were attached no less than seven Chestnut Lampreys. The paramount purpose of this article is to alert all sports and commercial fishermen to the danger involved as a result of the introduction of the Sea Lamprey into Louisiana waters. The accompanying illustration distinctly shows the distinguishing differences. Specimens of Lampreys taken should be sent in to the Department of Wild Life and Fisheries where they will be identified should the devastating Sea Lamprey ever enter the waters of our State.
