

Outside and Inside Dinosaurs

By Markle, Sandra

Scholastic, 2001. Soft cover. Book Condition: New. From Booklist: Gr. 3-5. In fairly simple language, Markle discusses what scientists have discovered about dinosaurs and how technology is used to research questions such as whether the syntarsus had sinuses and how high the apatosaurus could stretch its long neck. Focusing on individual fossils, which are clearly shown in the accompanying large color photographs, she shows that scientists use microscopes, X-rays, and computer programs as well as their knowledge of living dinosaur descendants and their reasoning skills to evaluate the fossil remains of dinosaurs. She challenges readers to look carefully at the photos and to try to gather information of their own. This well-designed book, with large illustrations and plenty of white space, the book offers a close look not just at dinosaur fossils but at the process of science as applied to a particular field.
