Createspace Independent Publishing Platform, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.The purpose of this volume of the The Imagineer s Chronicles is to show how changing ones perspective on the geometric structure of our universe from one of four dimensional space-time to four spatial dimensions can effect and simplify our understanding of the laws governing its evolution. Articles in this book such as the The Geometry of Dark Matter and Quantum entanglement: A Classical non-locality integrate common sense into our conceptual analysis of the unobservable by extrapolating our every day experiences and observations to the cosmological realm of dark matter and the strangeness of quantum entanglement While the article Reality verses Illusions demonstrates how can apply logic and the existence of four spatial dimensions to refute many of the outlandish claims made by many seemly rational scientists that a particle simultaneously exists in at every point in space and only materializes as a specific point when it is observed. We believe understanding nature should be attainable to those who have a need to and are willing to work at it so each article presents the concepts in jargon free language with enough background information in so that the reader will not have do further research to understand its contents. In other words we rely less on mathematics and more on conceptual logic and thought experiments (much like Albert Einstein did) to show how one can explain and predict all modern observations by redefining the space-time concepts of both The Special and General Theories of Relativity in terms of four spatial dimensions. A must read if you are interested in expanding your understanding of the reality of the unseen world of quantum mechanics and the higher...
