OPTICAL, STRUCTURAL AND REDOX PROPERTIES OF NANOTUBULAR J-AGGREGATES OF AMPHIPHILIC CYANINE DYES

Shaker Verlag Mai 2010, 2010. Taschenbuch. Condition: Neu. Neuware - This work addresses fundamental questions in the field of supramolecular nanoscale systems of self-assembled pi-conjugated molecules by presenting a comprehensive investigation of one particular supramolecular system: the double-walled nanotubular J-aggregates of amphiphilic cyanine dye 3,3' -bis(2-sulfopropyl)-5,5',6,6'-tetrachloro-1,1'-dioctylbenzimidacarbocyanine (C8S3). (i) It is shown that single tubular J-aggregates and bundles composed of several tubes can be distinguished by their unique optical spectra. The effects of the aggregation time, dye concentration, pH value, and...

Reviews

A brand new electronic book with a new standpoint. It is written in basic phrases rather than confusing. It has been designed in an extremely basic way which is merely right after I finished reading through this publication where basically altered me, change the way I believe.

-- **Kitty Crooks**

A fresh e book with a brand new point of view. It is definitely simplistic but surprises in the fifty percent of your ebook. It has been designed in an extremely basic way and is particularly just soon after I finished reading this ebook where in fact altered me, change the way I really believe.

-- **Dr. Alberta Schmidt V**

Good e book and useful one. It really is simplistic but shocks in the 50 % of your book. Your way of life period will probably be convert the instant you total reading this ebook.
