Forgotten Books, 2017. Paperback. Condition: New. Language: German . Brand New Book ***** Print on Demand *****. Excerpt from Acta Mathematica, 1886, Vol. 8 This question cannot be decisively answered until some method of computing the quantity considered is employed, which enables us to say, with tolerable security, that the neglected terms do not exceed a certain limit. If other forces besides gravity have a part in determining the positions of the heavenly bodies, the moon is unquestionably that one which will earliest exhibit traces of these actions; and the motion of the perigee is one of the things most likely to give us advice of them. Hence I propose, in this memoir, to compute the value of this quantity, so far as it depends on the mean motions of the sun and moon, with a degree of accuracy that shall leave nothing further to be desired.
