

The Leeds Correspondent Volume 2; A Literary, Mathematical, and Philosophical Miscellany

Filesize: 3.45 MB

Reviews

This ebook is indeed gripping and fascinating. it had been writtern really properly and helpful. I am very easily could possibly get a satisfaction of reading a published publication.

(Maude Ritchie)

Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1818 Excerpt: .circ.arc to rad. and b a sine x, and consequently when $x = OD$, y and of course the curve described by P are both = a quadrant.) Otherwise by Mr. A. Cook. While the radius OD moves into any position $O-PR$, suppose the point P to have moved from O to P and traced out the curve OnP . Draw Ond indefinitely near OPD ; also draw Vm perp. to Od . Let the veloc. of D : veloc. P :: m : n , put $OD = r$, arc $DD-x$, $OP = y$, nx . then the curve $OnP = Dd = x$, $mn-y$, $Yn=L$. m and by sim. tri. $Pm =$ Now $P^2-2 + mn = Pns$; that JL : the fluents are $x = \text{circ. arc to rad.}$ r An ingenious solution mas received from Mr. Johnson. (121) By Faciur. At the same time that a ball was let fall from the top of a tower, another was projected upward with a velocity of 100 feet per second, and it was observed that when the former arrived at the bottom, the latter was descending and at the distance of 20 feet: required the height of the tower. Solution by Mr. A. Cook. The projectile velocity upwards being 100 feet per 100 second, we shall have by the laws of gravity, $4 X 16 = 155.44$ feet = the height ascended to by the bi before it stops, and begins to fall downward; therefore the time of the ball s arriving again within...
