Excerpt from How to Improve Woolen and Worsted Mill Operations The American system of worsted spinning broke down the barriers and created the need for short wools, which became more and more in demand Gilling and drafting developments hove improved sliver variation, and top-breaking machines may give the uniformity in staple length that is so necessary By Francoise E. Cleyn President, Spinners Ltd., and Consulting Editor, Textile World On The Following Pages you will find descriptions of top-breaking machines and mill-installation stories illustrating their use. To properly place these machines in their true perspective, we should consider some of the events leading up to their development. The American System Proved Itself in Three Ways The thinking of the men who operate the worsted branch of the textile industry has changed drastically because of the American system. Although this system was received with a great deal of skepticism when it was first introduced, three basic facts have been clearly established: 1. Good yarn can be produced with a minimum of operations and doublings. 2. Wool can be subjected to long drafts under certain conditions without any deterioration in yarn quality. 3. The introduction of new types of machines has enabled the worsted industry to increase workloads and reduce costs considerably. This progressive thinking by the yarn mills and the machinery manufacturers has yielded excellent results, but only moderate progress has been made in the closely allied combing section of the industry. How Spinners and Combers Have Worked Together Combed wool is still the basic material of the worsted industry. Yard-to-yard evenness of top and uniformity of staple length are essential for the conversion of top into yarn on any system. Very little has been...
